

vGallery

Software for Art Galleries

available for Mac & PC developed with FileMaker Pro Advanced 12

Single-user running

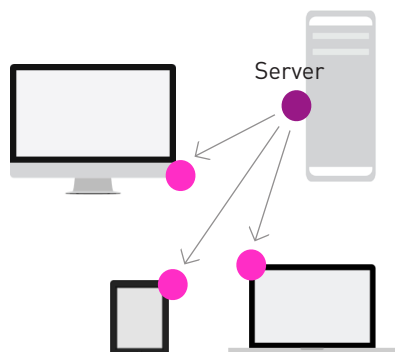

Standalone version provided with an installer.

In its standalone version, vGallery can be installed on a computer or iPad *. You can also copy vGallery on a USB pendrive and make run on another computer from the pendrive.

Price: € 1 850

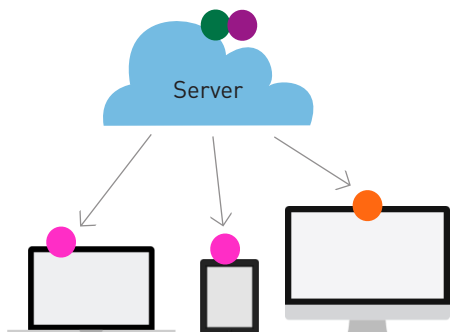

Multi-user configuration

1) Installation on a local network.

The computer that host vGallery is used as the server. The other computers connect via their local network. This configuration allows to work simultaneously on all computers, including the server.

Price: € 1 850 + € 150 by additional computer*

2) Installation on a remote network.

vGallery is hosted online, on our dedicated server. Users connect to it via the internet.

Advantages: updates and backups are done by us, you can access vGallery from any computer or iPad * connected to the Internet; generation of a dynamic website is also possible as an option.

Disadvantages: Performances vary according to the connection speed on connected computers, server subscription fees.

Price: € 1 850 + € 150 by additional computer*, + € 35 / month for server subscription (database size limited to 2 Go), + the cost of creation or adaptation of the website (on request).
